Reflection Questions:

Think about your view of God for a moment. What characteristics or attributes of God do you have a limited understanding - or a incorrect understanding? How does your limited view/understanding of God affect the way that you worship Him?

What are the areas of worship (devotionally and corporately) that you have made about you and your preferences - and not about ascribing worth to God? Begin by confessing those areas and asking God to give you His heart as your worship.

How do you prepare to worship (devotionally and corporately)? Are there aspects in life that you can change or arrange differently to make worship more of a priority, or as a way to more fully allow God to speak into your life in the times of worship? [practical ideas to implement]
